

# FAIR implementation

To create value and guide strategic decision-making in pharma and Life Science companies, data needs to be Findable, Accessible, Interoperable and Reusable (FAIR) both by humans and machines. The objective of the Pistoia Alliance [FAIR implementation project](#), from its inception in 2019 to today, is to enable precompetitive instruments for the implementation of FAIR data principles.

## Working Groups Phase 3

## Sponsors/ Steering

## Contributors

Thanks to our funders who are making this project possible, without their help this community would not exist or collaborate. Thanks for all the in-kind contributors for their time and expertise.

	Tools	Business Value	Best Practices	Thought Leadership
<b>P R O B L E M</b>	Lack of interoperability. High costs. Lack of FAIR standards. Multiplication of CV and ontologies.	Who benefits from FAIR, who pays and for what? How to maintain "Common good" FAIR resources?	How to orient organisations during their complex FAIR data implementation journeys?	Implementations of FAIR data principles are understood differently across organisations. "Fake FAIR" emerges.
<b>S C O P E</b>	Pistoia Alliance Pharma General Ontology	Defining personas. Towards an "ROI" of FAIR implementation	FAIR implementation Organisational Maturity Model	Dissemination of resources created in the project

## Selected Outcomes Working groups

Tools	Business Value	Best Practices	Thought Leadership
<p>Started survey for key concepts or "Pharma top 40"</p>  <p>Situated key concepts with enterprise-level ontology (GIST)</p> <p>Tested feasibility of creating simple models to address a compeneny question</p> <p>Define "Pharma General ontology" project charter</p>  <p>Project kick off in April 2024</p>	<p>Identified 5x FAIR user "personas" and draft of value proposition canvases</p>  <p>V1.0 methodology for pharma projects ROI, towards a FAIR ROI model.</p> 	<p>Co-creation of a first maturity assessment model of FAIR data principle implementation at the organisational level.</p> <p>6 maturity levels, L0-L5, in alignment with FAIR data frameworks. We identified 7 dimensions to describe FAIR implementation journeys:</p> 	<p>3x new use cases FAIRtoolkit FAIR4clinV 2.0</p> <p>FAIR Webinars:</p> <ul style="list-style-type: none"> <li>BMS : data model</li> <li>Novo Nordisk</li> <li>Swiss Inst. Bioinformatics</li> </ul> <p>Presentations at:</p> <ul style="list-style-type: none"> <li>BiotechX 2023</li> <li>BioITworld EU 2023</li> <li>FAIR at Pistoia Boston 2023</li> </ul> <p>Publication in, Data, 2024 Vol 9 Issue 4 doi.org/10.3390/data9040055</p>

## Resources

Since its inception in 2018, the FAIR implementation project created among others

[fairtoolkit.pistoiaalliance.org](http://fairtoolkit.pistoiaalliance.org) : resources and uses cases of FAIR in life-sciences

[fair4clin.pistoiaalliance.org](http://fair4clin.pistoiaalliance.org) : a document mapping FAIR in the clinical space

[fairmm.pistoiaalliance.org](http://fairmm.pistoiaalliance.org) :an organizational maturity model for FAIR

## Getting involved

FAIR continues as a "Community of Experts" in 2024 you are interested in sponsoring the activity financially or in-kind please pin

### Pistoia Alliance: Lowering barriers to R&D innovation

The Pistoia Alliance is a global, not-for-profit alliance of life science companies, vendors, publishers, and academic groups that work together to lower barriers to innovation in R&D.

Our members collaborate as equals on open projects that generate significant value for the worldwide life science community.
